

BOIL WATER NOTICE

March 12, 2024

The District of Lake Country in conjunction with Interior Health has issued a **BOIL WATER NOTICE** for all customers on the **Beaver Lake source**, immediately following the planned water system outage that occurred on March 12, 2024. A map highlighting the affected customers is attached, and an interactive [water source map](#) can be found on our website.

The District of Lake Country and Interior Health recommend that **ALL** customers in the affected area drink boiled water or a safe alternative. Water intended for drinking, washing fruits and vegetables, making beverages or ice, or brushing teeth should be boiled for one minute. Boiled water should then be refrigerated in a clean, covered container. Customers could also choose to use bottled or distilled water, or water that has been filtered through a well-maintained treatment device.

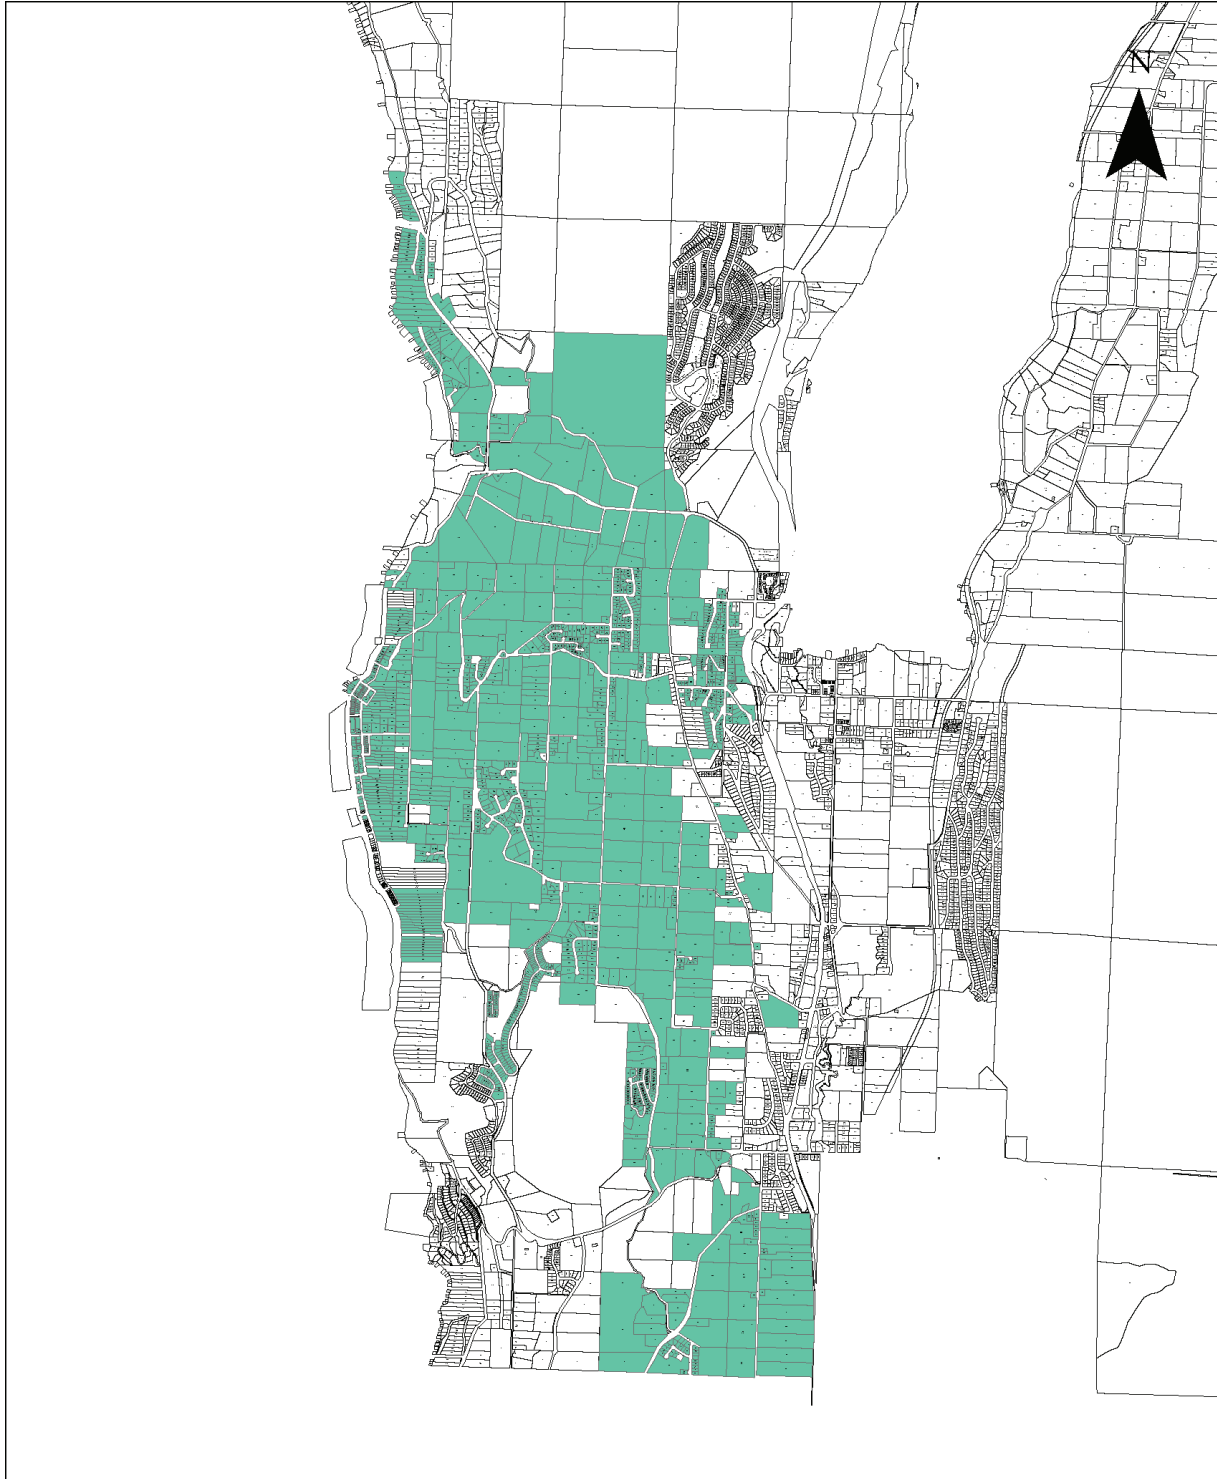

In accordance with Interior Health requirements, owners of all public facilities must post “Boil Water Notices” at all sinks or drinking water fountains accessible to the public. (Alternatively, public fountains and taps may be turned off).

We appreciate your cooperation and patience during this time. If you have any questions, please contact –The District of Lake Country at 250-766-6677 or check out our website at <http://www.lakecountry.bc.ca/utilities>.
